## **Pet Emergency Preparedness Plan**

- Ordinarily, only service animals are allowed inside public mass care shelters, although SMART (The State of Massachusetts Animal Response Team) may be able to assist at these facilities with animal sheltering accommodations.
- Make plans ahead of time to take your pet to stay at relatives, friends or a kennel outside the affected area.
- Know the locations of pet-friendly hotels and motels.
- Prepare a list of boarding facilities and veterinarians who could shelter animals in an emergency; include 24-hour phone numbers.
- Consult with your local animal control officer and Emergency Management office about possible temporary shelter facilities in your community.
- Ask local animal shelters if they provide emergency shelter or foster care for pets in a disaster. Animal shelters may be overburdened caring for the animals they already have, as well as those displaced by a disaster, so this should be your last resort.
- Prepare an emergency kit for your pets; include collars & leashes, a 3-5 day supply of food and water, a manual can opener, bowls, litter boxes, photographs (you with your pet), and a week's supply of medications that your pet may be taking, including instructions (in case you and your pet are separated).
- Have copies of your pets' vaccinations, medical records and prescriptions in a clean plastic bag or waterproof container.
- Make sure your pets wear collars with current license and rabies tags, and identification tags that include information on where you will be staying during the emergency.

- Use a pet carrier for each of your pets to make transportation easier.
- Birds should be transported in a secure travel cage or carrier. During warm weather, carry a plant mister to spray the birds' feathers periodically. Do not put water inside the carrier during transport.
- Provide a few slices of fresh fruits and vegetables with high water content.
- Have a photograph for identification and leg bands.
- If the carrier does not have a perch, line it with paper towels and change them frequently. Try to keep the carrier in a quiet area. Do not let the birds out of the cage or carrier.
- Exotic or dangerous pets are generally dealt with on a case-by-case basis, to ensure that they are handled, transported and cared for by trained personnel at appropriate facilities. To insure the safety of their animals, owners of this type of pet should have advanced planning preparations ready for their pet's special needs.
